

Riviera Beach Utility District
Proposed Water Main Replacement
Lake Drive and Inlet Way
Estimated Start: May, 2019

Chen Moore Engineers are working with Riviera Beach Utility District and Palm Beach Shores staff to plan the replacement of the water mains along Lake Drive and Inlet Way. The mains on Ocean Avenue have already been updated so this will complete improvement of the Town's outer ring water supply.

At some point in the future, they plan to move the water supply from behind the single family homes to the street but there is no timetable set for that yet.

Current estimate is for the project to begin in May, 2019 and to last up to 6 months. Details to follow as we have them.
